## DETAILED ACTION

### *Election*

Applicant's election with traverse of the first species of Figures 1-7, claims 1-14, in the reply filed on April 16, 2007 is acknowledged. The traversal is on the ground(s) that the species are closely related to each other such that would not present a serious burden on the Examiner. This is not found persuasive because there exists a major burden on Examiner to search both species with the first species having all of the elements and features as recited in claims 1 and 2, in particular, four areas of fastenings and their positions relative to each other and as well as the pluralities of first and second openings and how these openings are related to the four areas of fastenings, and with the second species having all of the elements and features recited in claims 15, in particular, the rear side, the front side, the passage, and as well as the flap.

The requirement is still deemed proper and is therefore made FINAL.

Claims 15-23 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected embodiment, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on April 16, 2007.

***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Dawson on June 21, 2007.

The application has been amended as follows:

Cancel claims 1-11 and 15-23.

***Allowable Subject Matter***

Claims 12-14 are allowed.

The following is an examiner's statement of reasons for allowance: the art of record when considered alone or in combination neither renders obvious a protective wrap for covering an intravenous site on a person including an entertainment device comprising all of the elements as recited in independent claim 12, in particular, the first set of openings for inserting a portion of an entertainment device therethrough, the second set of openings arranged vertically, the second area of fastening for receiving a palm of a hand to rest thereon, the third area of fastening material on the wrap's front side attaches to wrap's rear side's the second area of fastening material, the first area of fastening material on the wrap's rear side attaches to wrap's front side's the fourth area of fastening material.

Art Unit: 3772

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 4,671,787 (Widman) discloses a support wrap system for intravenous tubing but Widman's wrap system lacks the disclosure of the plurality of first and second openings and as well as second and fourth areas of fastening materials.

U.S. Patent No. 5,649,901 (DiPietro et al) discloses a knee brace in Figures 3 and 4 but the knee brace does not have the plurality of first and second openings.

U.S. Patent No. 5,695,453 (Neal) discloses a limb immobilizer comprising a plurality of openings but does not teach claimed rear side comprising fastening materials.

U.S. Patent No. 5,076,289 (Darling) discloses an intravenous support means comprising elements as shown in Figures 1 and 2 but does not appear to disclose a rear side of the device comprising an area of fastening material.
